[Lessons](#)

Prerequisites

- Oracle9i: SQL, PL/SQL, and SQL
- Oracle9i Database: Fundamental

Course Summary

This course introduces the concepts of Oracle9i® network configuration and database backup and recovery. You will learn how to configure the Oracle9i network environment to support connections to and from the database. You will also learn how to perform backups of the Oracle database using various techniques and how to recover the database in various failure scenarios. Finally, you will learn how to load, move, and reorganize large volumes of data very quickly using Oracle-provided utilities. This course helps prepare students for Oracle's exam, Oracle9i Database: Fundamentals II (1Z0-032).

Lessons

- 1 - Oracle Networking
- 2 - Backup and Recovery Overview
- 3 - User-managed Backup and Recovery
- 4 - Recovery Manager Backups
- 5 - Recovery Manager Recoveries
- 6 - Loading and Moving Data
