Prerequisites

- Introduction to Oracle9i

Course Summary

This course introduces students to data server technology and explores the concepts of relational databases, the SQL*Plus interface tool, and the powerful SQL and PL/SQL programming languages. Students will learn and practice how to create and maintain database objects. The students will also learn to store, retrieve, and manipulate data. Finally, the students will learn how to create PL/SQL blocks of application code that can be used in Oracle® forms, reports, and other Oracle applications. This course will help the student to prepare for Oracle's exam, Introduction to Oracle9i SQL (1ZO-007).

Lessons

- 1 - Introduction to Oracle9i: SQL, PL/SQL, and SQL*Plus
- 2 - SQL*Plus Commands
- 3 - Filtering and Sorting Data
- 4 - SQL Functions
- 5 - Working with Multiple
- 6 - Tables and Constraints
- 7 - Other Database Schema Objects
- 8 - Building PL/SQL Blocks
- 9 - PL/SQL Control Structures
- 10 - Cursors
- 11 - Exception Handling
- 12 - Procedures and Functions

13 - Oracle Packages

14 - Oracle Triggers

15 - PL/SQL Collections
